PROFESSIONAL SUMMARY

Motivated and disciplined Computer Science student with a strong technical foundation in IT operations, technical support, and data management. Experienced in troubleshooting hardware and software configurations, maintaining corporate digital infrastructure, ensuring high-accuracy secure record keeping, and optimizing overall office workflows. Proven ability to learn technical systems rapidly and collaborate effectively within fast-paced organizational environments to drive operational and IT efficiency, full stack web app developer with more than 20 perfect websites.

WORK EXPERIENCE

IT Officer (Intern) Feb 2024 – Jun 2024

Noor Private Services Company

- Provided front-line technical support, efficiently troubleshooting hardware, software application errors, and local
- network connectivity issues.
- Managed and maintained essential office technology infrastructure, including the configuration, deployment, and setup
- of printers, scanners, and peripheral equipment.
- Performed high-accuracy data entry updates and structured complex digital documentation tasks using the MS Office
- suite.
- Prepared, organized, and routinely updated technical records, administrative logs, and internal office documentation.
- Maintained an exceptionally clean, well-organized, and safe technical workspace and server/workstation area.

Computer Operator & IT Support (Volunteer) Jun 2023 – Nov 2023

Youth Community Support Center

- Delivered fundamental IT technical support, desktop hardware troubleshooting, and operating system updates to
- students and staff.
- Managed, updated, and systematically secured comprehensive participant database structures utilizing advanced
- Excel spreadsheets.
- Designed visually clear, structured PowerPoint interactive presentations and digital training aids for community
- development programs.
- Assisted with the operational workflow setup, document scaling, digital printing, and logistical distribution of course
- materials.
- Ensured absolute data integrity, accuracy, and proper structure of all digital archives and cloud-stored information
- assets.
